

Halo Retail Self Service

A person with long, curly blonde hair is interacting with a self-service checkout kiosk. They are holding a yellow cup in their left hand and pointing at the screen with their right hand. The kiosk screen displays various product images and text. The background is a wooden wall.

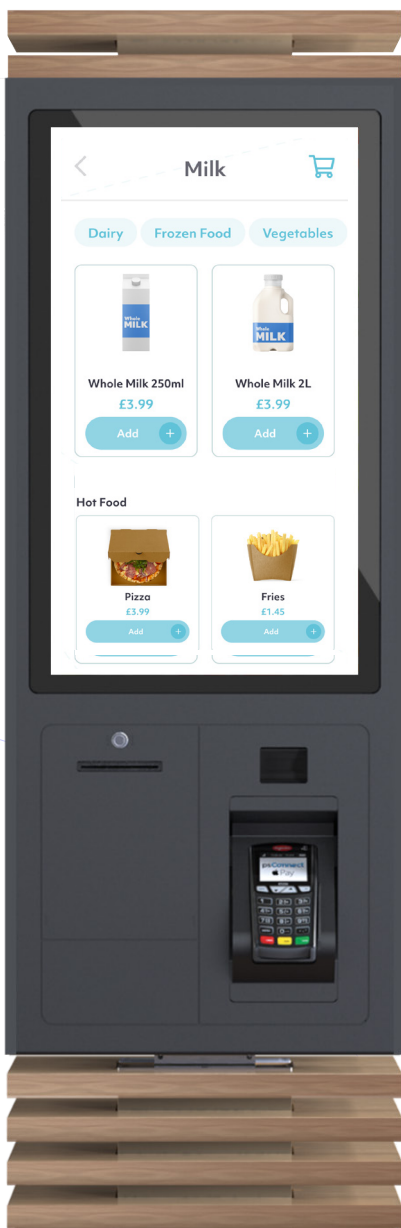

Self-service is no longer the future; self-service is the now. Queue reduction, spend maximisation and footfall inflation is only the beginning. Self-service checkouts provide a seamless service, displaying product details including nutritional and allergen information that could otherwise be missed, and enables fast, secure payment.

"Your most loyal customers from now on could be the ones you never see."

Increase footfall,
maximise spend, reduce
queues and enhance
customer experience.

The Food Service Sector recognises the benefits of Self-Service. Quick Service Restaurants (QSR) have aggressively adopted Self-Service Kiosk (SSK) technology because:

- Reduces labour costs, improves speed of service, and accuracy of orders.
- Increases sales due to up-selling; and is generally an attractive option for Millennial customer.
- Display product details including nutritional and allergen information.
- Increase Hot Food & Deli Footfall.
- Maximize Basket Spend – self-serve average basket increase of 30%.
- Maximise the efficiency of Hot Food & Deli Staff.
- Meet expectations on cashless payment and convenience.
- Secure and fast mobile & card payments.
